

CHHATTISGARH STEEL CONCLAVE

18 - 19 October 2013, Raipur

Highlights

The steel industry not only in India but also in our state is going through the most challenging period ever. On one hand the demand seems to be stagnated and on the other hand, raw materials availability and cost seems to be out of control. Many sponge iron and steel making units in the state are facing survival problems and few of them have already stopped their operations. The issues like availability and quality of power, pollution control norms need to be discussed at length.

The sponge iron & steel producing units, technology and equipment suppliers, consultants, policy makers, everybody
