

Create New Facilities for Increasing in Yield : G. Mohan Kumar, Steel Secretary

Sri G. Mohan Kumar, Secretary, Steel During Interaction Session with Senior Management

Seeing the new Blast Furnace in operation was very excited indeed. This Blast Furnace has very clean surroundings. I hope furnace production will be optimized and stabilized very soon” said G Mohan Kumar, Secretary, Ministry of Steel, during his maiden visit to the state-of-the-art new Blast Furnace-3 recently.

Mohan Kumar visited Model Room & Awards Gallery, major production units like Raw Material Handling Plant, Coke Ovens, BF-1, SMS-1, WRM-1 and expansion units Blast Furnace-3, Steel Melt Shop-2, Wire Rod Mill-2 etc recently.

Earlier, the Steel Secretary witnessed a

Corporate Presentation of RINL and interacted with the top management and made several suggestions for improvements in techno-economic parameters and for achieving more international bench marks in its operations. There is a great challenge before RINL in stabilizing the new units and devotion and determination of one and all is the need of the hour, he observed on his maiden visit to the plant.

Sri Mohan Kumar while reviewing the performance of RINL, deeply interacted on current expansion, on-going modernization projects, new facilities for increasing the yield of liquid steel etc. He observed that “RINL has

much more value in future” and said that the modernization drive initiated by the organization has to be completed in time as a goal oriented programme to demonstrate the capability of the Company in this competitive market. He exhorted that the RINL collective should strive for achieving more international bench marks in increasing Productivity etc.

In his welcome address, AP Choudhary, CMD, RINL explained the achievements and future plans of the organization and sought the guidance and support of the Steel Secretary for further improving the performance. He said that RINL is a pioneer in adoption of green technologies and consistently running the plant more than 100% capacity utilization for the last 12 years. On HRM front, Choudhary said that through redeploying and retraining, RINL is able to meet its expansion needs with just minimum manpower addition.

Later Steel Secretary interacted with representatives of Steel Executive Association, Unions, and SC&ST Association and advised them to put all efforts to enhance the production levels and also to achieve international bench marks since RINL has very bright future.
